OVERVIEW

Global economic growth is projected to be steady in the near term but below its prepandemic trend. The International Monetary Fund (IMF) in the October World Economic Outlook (WEO) report maintained its forecast of global economic growth at 3.2 percent in 2024.¹ Stronger-than-expected outturns in consumer spending investment in the United States (US), coupled with robust economic fundamentals India and Brasil counterbalanced downgraded growth forecasts for China and other advanced economies. Disinflation is anticipated to continue globally and occur more rapidly in advanced economies. At the same time, downside risks to the outlook include geopolitical tensions, abrupt or delayed fiscal consolidation, and catastrophic weather events.

Domestically, economic growth has gained traction, primarily driven by robust visitor arrivals and its positive effect on related sectors. The economy is envisaged to grow by 3.8 percent in 2024 and 3.4 percent in 2025.²

Sectoral outcomes were generally positive cumulative to September, although industryspecific challenges persist. Strong outcomes continued to be noted in the tourism sector, with higher-than-expected record visitor arrivals (6.3%) in the review period. Total sugar production fell by 9.6 percent and total cane production fell by 15.0 percent at the end of the comparative season last year. However, the TCTS³ ratio improved to 10.6 relative to 11.2 a year ago. Electricity production (11.0%) and its consumption (9.3%), gold extraction (32.3%), as well as timber output (woodchips: 13.1% and sawn timber: 18.2%) improved.

Contrastingly, mineral water (-9.9%) and mahogany (-0.7%) production continued to contract, owing to sector-specific challenges.

Consumption activity as revealed by partial indicators remained strong in the year to September. Net VAT collections rose (39.7%) underpinned by higher domestic and customs VAT collections, in line with the increased Wholesale and Retail Trade (WRT) Survey results up to the June quarter. Also, commercial banks' new consumptionrelated loans (excluding refinance), grew annually by 28.0 percent driven by increased credit to the WRHR⁴ sector. Additionally, vehicle registrations rose (18.1%) cumulative to September, driven by increased registration of second-hand vehicles. Consumption spending is mirrored in the August Retail Sales Survey (RSS), which estimates retail sales to expand by 5.0 percent, higher than the February survey (4.2%).

Investment activity gradually improved over the year to September. New credit for investment purposes (excluding refinance), rose by 26.3 percent, mirroring both increased investment appetite and the effect of higher prices. In tandem, domestic cement sales rose by 9.4 percent in the year to September, indicative of a pickup in construction activity. Overall feedback from the August Business Expectations Survey (BES) reflects positive sentiment on medium-term business conditions, with 44.7 percent expressing optimism, slightly down from 45.0 percent in the previous survey. Moreover, the August survey showed continued positive investment intentions in plant and machinery while, sentiment around

1

¹ Unchanged from the IMF's April and July assessment.

² An upward revision from 2.8 percent and 3.0 percent in 2024 and 2025, projected in June this year.

³ Total Cane to Total Sugar (TCTS) ratio measures the tonnage of canes required to produce a tonne of sugar.

⁴ Wholesale, Retail, Hotels and Restaurants.

investment in buildings has rebounded since the February survey.

During the review period, labour market tightness softened as the demand for local labour fell against higher imported labour and resident departures declined. The RBF's Job Advertisement Survey recorded a fall in job vacancies by (-11.3%) in the year to September. This aligns with the August BES which indicates lower hiring intentions compared to the February survey. Moreover, majority of businesses have increased wages of existing employees as a retention strategy, which is evident in the higher wages (10.3%)⁵ and Pay as You Earn (24.5%) collections noted in the year to September.

On the prices front, annual headline inflation fell to 4.2 percent in September, from 6.7 percent recorded in June. Higher prices for food and non-alcoholic beverages, and alcoholic beverages, tobacco & narcotics categories underpinned the outcome. Inflation forecast for year-end 2024 is projected to be at 3.5 percent. The latest BES reveals that majority of businesses expect domestic inflation rate to range between 4.0 percent to 6.0 percent in the medium term.

Financial sector conditions were favourable with adequate liquidity (\$2.3b) and near historic low lending rates supporting the growth momentum.

In the September quarter, new lending by commercial banks increased by 22.8 percent. Furthermore, according to the August BES findings, most firms expect commercial banks' lending rates to be stable in the short to medium term.

On the external front, cumulative to July 2024. Fiii's trade deficit⁶ narrowed by 3.8 percent, driven by a strong 7.7 percent growth in exports which outpaced a nearstagnation of import payments of 0.04 percent.⁷ Cumulative to September, inward personal remittances grew by 6.9 percent to with mobile network \$978.2 million. operators being the largest platform used for transactions. Outward remittances noted a higher growth of 11.3 percent (\$362.7m), however, on a value basis, the growth in inward remittances was higher. Cumulative to June quarter, estimated tourism earnings reached a record high of \$1,136.8 million.

Foreign reserves (RBF holdings) stood at \$3,762.0 million in September 2024, sufficient to cover 6.1 months of retained imports (MORI).

Given the comfortable medium-term outlook for inflation and foreign reserves, the RBF maintained its monetary policy stance and kept the overnight policy rate unchanged at 0.25 percent in the September quarter.

2

⁵ Data is sourced from Fiji National Provident Fund (FNPF). Constitutes only formal wages.

⁶ Trade deficit (value of imports exceeding the value of exports) excluding aircraft.

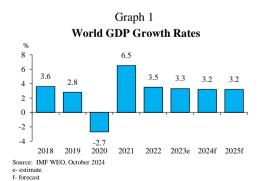

⁷ This outcome was partially shaped by a higher July 2023 base effect of a one-off medical equipment import (aid-in-kind). Discounting this, merchandise import would have noted a 2.9 percent increase.

THE INTERNATIONAL ECONOMY

International Economic Conditions

Global growth for 2024 is projected to remain steady at 3.2 percent (from 3.3% in 2023), according to the IMF's October WEO report (Graph 1). This year's growth outlook is primarily driven by stronger-than-anticipated consumer spending in the US, along with robust economic fundamentals in India and Brazil, which counterbalanced reduced growth forecasts for China and other advanced economies. A similar growth of 3.2 percent is projected for 2025. Disruptions to production, conflicts in the Middle East, and catastrophic weather events have led to lower growth forecasts for emerging markets and developing economies.

Global headline inflation is expected to continue moderating. In the baseline scenario, inflation is projected to ease from an average of 6.7 percent in 2023 to 5.8 percent in 2024 and 4.3 percent in 2025. Disinflation is anticipated to occur more rapidly in advanced economies. In contrast, emerging markets and developing economies are expected to see inflation fall more gradually in 2024.

In the review period, growth rates for Fiji's trading partner economies (TPEs) remained positive except for New Zealand (NZ). Over the second quarter, the Japanese economy rebounded, expanding by 0.7 percent (following a 0.6% contraction in the prior quarter), fuelled by greater consumption appetite with improved public and private demand. Australia recorded a growth of 0.2 percent in the June quarter and the Indian economy registered a 1.3 percent expansion over the same period.

Moving into the third quarter of 2024, the US economy expanded by 2.8 percent, and the Euro Area noted an ongoing recovery with a 0.4 percent growth. China's economy grew by 0.9 percent (seasonally adjusted) in the third quarter, driven by government efforts to boost consumption, address deflation risks, and revive the real estate sector. On the other hand, the NZ economy contracted by 0.2 percent in the June quarter, following a downwardly revised 0.1 percent expansion in the previous quarter. The unemployment rate for most TPEs remains low, indicating tight labour market conditions.

Headline annual inflation rates in most economies are gradually moving toward the target range set by the respective central banks. In the third quarter of 2024, the inflation rate in Australia and NZ fell within the central bank's target range, reaching 3.8 percent and 2.2 percent, respectively. In the US, the annual inflation rate stood at 2.4 percent in the September quarter compared to 3.0 percent in the prior quarter. For China, annual inflation was 0.4 percent in September, slightly higher than 0.2 percent in

June. Similarly, prices eased marginally in Euro Area and Japan to 1.7 percent and 2.5 percent, respectively. On the other hand, prices rose modestly in India to 5.5 percent in September (from 5.1% in June), due to a surge in food prices.

Most TPEs' central banks lowered their key interest rates in the September quarter of 2024, as inflation cools (Table 1). The US Federal Reserve lowered its Fed fund rates by 50 basis points (bps) in its September meeting to 4.75-5.00 percent and the European Central Bank lowered rates by 60 bps in the same period. The Reserve Bank of New Zealand lowered key interest rates by 25 bps in its August meeting, while the Peoples Bank of China lowered rates by 10 bps in July. On the contrary, the Bank of Japan raised its interest rate by 0.25 percent in July while the Reserve Bank of India maintained its policy repo rate at 6.5 percent since it was last raised in February 2023.

Most **commodity prices** exhibited favourable trends except for global food prices which strengthened in the third quarter (September end vs June end). In contrast,

⁸ Month-end world market sugar prices per the New York No. 11 benchmark. Brent crude oil prices noted a decline, while gold and sugar prices gained.

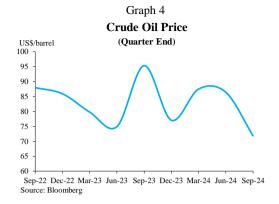

World market sugar⁸ prices rose significantly by 10.7 percent to US22.47 cents per pound in September compared to June, driven by tighter supply from Brasil and India - the largest sugar producers (Graph 2).

Gold prices reached another all-time monthend high of \$2,659.40 per fine ounce in September, significantly rising by 13.7 percent from June, underpinned by escalating tensions in the Middle East and large cuts in the US Federal Reserve Funds Rate (Graph 3).

The price of **Brent crude oil** fell by 16.9 percent over the September quarter, settling at US\$71.77 per barrel, primarily due to excess fuel inventories (Graph 4).

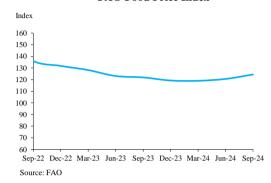

Global food prices⁹ increased by 3.2 percent in September, reaching 124.4 points compared to June. Price quotations for all commodities in the index rose, with sugar seeing the most significant jump at 10.4

percent. Overall, the food price index was 2.1 percent higher than the same period last year but remained 22.4 percent below its peak of 160.3 points recorded in March 2022 (Graph 5).

⁹ As measured by the United Nations Food and Agriculture Organisation (FAO) Food Price Index.

RBF Quarterly September 2024

THE DOMESTIC ECONOMY

Domestic Economic Conditions

The Fijian economy is projected to expand by 3.8 percent in 2024, an upward revision from the 2.8 percent projected in June (Graph 6).¹⁰ The upgraded economic growth is underpinned by the strongerthan-expected outturn in visitor arrivals, coupled with the increased consumption spending, driven by higher incomes and remittances, tourism-driven demand. higher government spending and a pickup in new lending. In addition, investment activity continues to progress, albeit at a slow pace, 11 while labour shortages and ease of doing business processes are gradually improving. Sectors expected to contribute to economic growth in 2024 are finance. transportation, administration. accommodation, information & communication, agriculture, manufacturing, wholesale & retail, real administration. mining. estate. and professional services sectors.

Going forward, the growth forecast for 2025 has been upgraded to 3.4 percent, underpinned by the services and related sectors, as well, as the industrial and primary sectors. Growth in 2026 and 2027 is expected to revert to its long-term growth rates, at 2.9 percent and 2.8 percent respectively.

Production

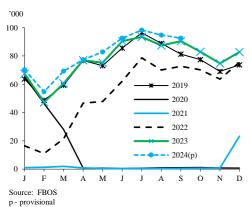

According the latest economic to indicators, sectoral production generally positive in the review period. Cumulative to September, visitor arrivals surpassed expectations with an increase of 6.3 percent to 732,865 tourists (Graph 7), compared to 689,142 visitors in the same period in 2023. Notably, the month of September alone set a new record of 92,591 Visitors from Australia (1.8 tourists. percentage points (pp)), followed by the US (1.1pp), NZ (0.9pp), Pacific Islands (0.8pp) and China (0.7pp) underpinned the growth. A new arrivals benchmark in 2024 (given the year-to-date upbeat performance) and introduction of a direct route to Dallas (effective 10 December 2024) is expected to bring in additional visitors in 2025.

¹⁰ Latest Macroeconomic Committee GDP growth forecasts as of 15th November 2024.

¹¹ Investors are challenged by the higher-cost environment impacting both the completion of existing and commencement of new projects.

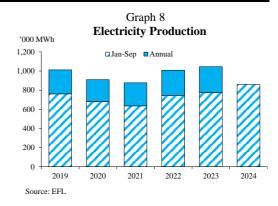

Graph 7

Monthly Visitor Arrivals

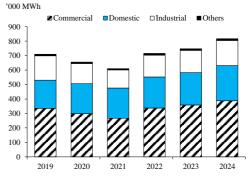

the sugar industry, 2024 the sugarcane crushing season concluded on 11 November. As such, total cane production fell by 15.0 percent to 1,331,301 tonnes (t) from the decline (-4.5%; 1,565,564t) noted last season. Comparably, sugar processed contracted by 9.6 percent to 126,184t relative to the reduction (10.4%; 139,628t) recorded last season, despite the TCTS ratio¹² improving to 10.6 from 11.2. A combination of factors including limited cane supply underpinned the outturn in the current season,13 resulting in the crushing period concluding around five weeks earlier than last season.

Indicative of the strengthening economy, electricity generated in the year to September rose (11.0%) by EFL¹⁴ to 859,686 Megawatt hours (MWh), (Graph 8). Renewable energy sources accounted for 57.4 percent of total electricity generated, lower than the 51.2 percent recorded cumulative to September last year. Comparably, total renewable energy generated also increased (by 24.4% to 493,804 MWh) over the same period a year ago.

Similarly, electricity consumption rose annually by 9.3 percent (to 816,932 MWh) in the year to September, mainly due to increased demand from industrial (12.8%), domestic (9.1%), and commercial (8.1%) consumers (Graph 9).

Graph 9
Electricity Consumption
(Jan-Sep)

Source: EFL

The mining sector continued its strong performance cumulative to September, boosted by production from Tuvatu gold mine. Gold production increased by 32.3 percent to 21,960 ounces (oz) following a 13.0 percent contraction in the same period in 2023 (Graph 10). Mineral water production on the other hand, contracted in

¹² Tonnes of cane to tonnes of sugar (TCTS).

¹³ Combination of factors include unfavourable weather conditions, increased burnt cane and frequent mill breakdowns.

¹⁴ Energy Fiji Limited.

¹⁵ Tuvatu started production in December 2023.

¹⁶ By Vatukoula Gold Mine Limited (VGML) alone.

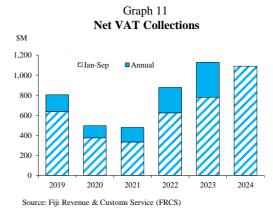

the same period (-9.9%) due to ongoing calibration work at the plant.¹⁷

timber industry recorded improvements over the year. Cumulative to September, pinewood supply contracted by 32.5 percent (to 120,652 tonnes), mainly attributed to sufficient stock in the yards. However, sawn timber production rose by 18.2 percent (to 21,701 cubic meters (m³)), similar to the wood chip production which grew by 13.1 percent (to 173,890 tonnes). The positive outcome in woodchip production was driven by higher export demand. Contrastingly, mahogany production contracted by 0.7 percent to 17,372m³ in the year to September, owing to adverse weather conditions limiting access to forests and a shift of contractors to the pine industry due to its increased activity.

Consumption

Consumption activity was positive cumulative to September as denoted by partial indicators, backed by increased tourism demand, higher disposable incomes, government spending and higher inward remittances.

Net Value Added Tax (VAT) collections rose by 39.7 percent (to \$1,088.8m) cumulative to September, as higher domestic (42.3%, to \$708.1m) and customs VAT (37.2%, to \$654.3m) collections more-than-offset the increase in refunds (38.6%, to \$280.1m) (Graph Additionally, the WRT Survey¹⁹ indicated positive consumption sentiment, revealing total sales/service income rose annually (4.3%) to \$3,267.5 million up to the June 2024 quarter, although lower in comparison to the comparative 2023 period (14.0%). However, in real terms, the WRT sales income contracted by 2.2 percent in the year to June, due to high prices.

Commercial banks' new lending for consumption purposes grew²⁰ (28.0%) to \$1,324.6 million in the year to September, driven by increased loans to the WRHR sector (26.8% to \$1,129.7m).

Similarly, vehicle registrations improved by 18.1 percent (compared to a 9.3% contraction a year ago) in the year to September, largely due to increased registrations of second-hand private vehicles.

¹⁷ The Company is a major player in the industry.

¹⁸ The VAT rate on non-essential items increased from 9 percent to 15 percent since 1 August 2023.

¹⁹ This survey is undertaken by the Fiji Bureau of Statistics (FBOS) on a quarterly basis.

²⁰ Excluding refinancing, to gauge appetite for fresh loans.

Looking ahead, consumption spending is mirrored in the August RSS which now expects a higher growth in retail sales of 5.0 percent, from 4.2 percent anticipated in the previous survey.

Investment

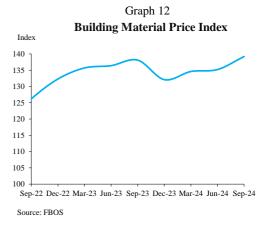

Despite a relatively weak first half of the year, investment activity has gradually picked up from the third quarter, with forward-looking indicators now suggesting a more gradual improvement in activity.

The estimated value of work put-in-place,²¹ a measure of construction activity, was lower (-8.9% to \$244.5m) on an annual basis in June due to a slow uptake (-15.7%) of private construction works. In real terms,²² the total value was lower over the quarter (-0.6%) and year (-8.1%), implying slow-paced construction activity, linked to Building Material Price Index (BMPI) remaining elevated in the review period despite noting a slight ease in prices.

However, while prices remain elevated, the review period has noted an expansion in credit for investment purposes (excluding refinancing) by 26.3 percent (to \$715.8m), largely attributed to the rebound in lending to the building & construction (B&C) sector (60.3% to \$246.1m), which indicative of stronger investor confidence. Domestic cement sales increased by 9.4 percent (to 95,306 tonnes) up to September, driven by increased construction activity.

On price developments, building material prices in September 2024 rose on a quarterly basis by 3.0 percent (to 139.2 points). Higher prices of electrical products and cement & related materials

more-than-offset the fall in prices of plumbing ware, and iron & steel (Graph 12). However, prices contracted (-0.3%) on average in the year to September, largely due to a decline in prices of cement-related materials.²³

The total number (2.6%) and value (51.8%) of building permits issued,²⁴ a forward-looking indicator, increased in the June quarter, indicative of residential and non-residential readiness to uptake new construction projects. On cumulative basis, total number (-27.4%; to 466 permits) fell while a significant increase in value (99.7% to \$278.6m) was noted, reflective of higher prices.

Going forward, the August BES showed that sentiments on business conditions in the medium term are positive (44.7%), although optimism is not as strong when compared to the previous survey (45.0%). Furthermore, BES data indicates that intentions to invest in plant and machinery continue to be positive, while sentiments on investment in building has rebounded from the February survey in the medium-term outlook.

9

²¹ Lagged Data.

²² Deflated outcome based on average BMPI cumulative to June quarter data.

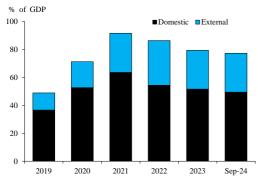

²³ This is based on the new 2019 BMPI base.

²⁴ Lagged Data.

Public Finance

Government debt stood at \$10,442.0 million in September 2024, or 77.2 percent of GDP²⁵ (Graph 13). Domestically denominated debt totalled \$6,677.7 million (49.4% of GDP), while external debt stood at \$3,764.3 million (27.8% of GDP).

Graph 13
Government Debt

Sources: Ministry of Finance, Strategic Planning, National Development and Statistics, RBF

Labour Market

Partial indicators of the labour market continued to reveal signs of softening. Results of the RBF Job Advertisements Survey indicate that the demand for local labour has moderated (-11.3% to 11,070 vacancies) cumulative to September, compared to 1.1 percent decline in the previous quarter (Graph 14). The reduction in recruitment intentions was largely observed in the community, social and personal services, WRHR and electricity & water sectors. The August 2024 BES revealed that sentiments for employment were lower (37.5% from 50.7% in the February Survey), in line with Job Advertisements, citing no changes in business operations, high cost of labour and improved efficiency in the workplace.

Furthermore, higher wages (10.9%) and PAYE (24.5%) collections were recorded in the year to September, reflecting enhanced wage compensation strategies directed towards employee retention and wage bargaining amid high cost-of-living pressures. Likewise, this aligns with the August BES confirming that a majority (78.0%) of employers raised wages as a retention incentive as they experienced loss and difficulty in finding replacement for highly skilled and semi-skilled workers.

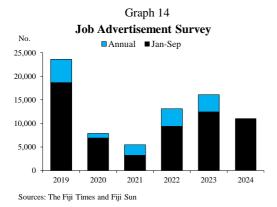

Cumulative to September, the movement of Fijian citizens abroad continued to decline (-33.1%) since March 2024, following policy tightening in source countries. Specifically, resident departures education and training fell by 52.5 percent (-2,379 people), while emigration declined by 28.9 percent (-703 people). Similarly, departures for employment dropped by 23.0 percent (-1,436)people), departures for other purposes decreased by 26.6 percent (-476 people) compared to the same period in 2023.

Cumulative departures under labour mobility schemes also decreased by 28.6 percent due to stricter labour policies abroad. According to the August BES, future hiring intentions from abroad had eased as more businesses had expressed that they would not be importing labour. The survey also reflected a reduction in businesses affected by migration (86.1%) compared to the February Survey results (94.6%), which is indicative of cooling labour activity. Sectors largely affected

-

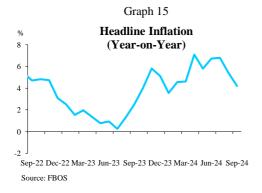

²⁵ Based on Nominal GDP.

were the ICT, finance & insurance, manufacturing, and wholesale & retail trade.

Inflation

The annual headline inflation rate in September settled at 4.2 percent, from 6.7 percent recorded in June. Food and non-alcoholic beverages and alcoholic beverages, tobacco & narcotics categories were the major contributors to the outcome (Graph 15).

The 2024 year-end inflation is projected to settle at 3.5 percent, lower than 5.1 percent recorded in December 2023. This is mostly based on the recent trend in inflation which has slowed since July (6.8%) as the impact of VAT rate hike implemented last year wanes.

In addition, businesses expect inflation to remain elevated in the medium term as per the latest BES, with majority indicating that inflation could fall within the 4-6 percent range for the next 12 months, similar to previous survey outcomes. This aligns with economic sentiments and the current inflationary environment.

External Sector

In the year to July, Fiji's trade deficit²⁶ narrowed by 3.8 percent annually, totalling \$2,444.0 million, compared to a slightly greater \$2,539.8 million deficit in the same period last year. A strong export performance over the first seven months of 2024, particularly from re-exported items, comfortably offset the near stagnation in merchandise imports, influencing the narrowed outcome.

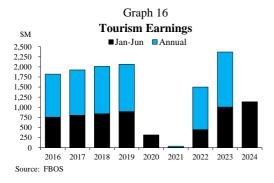

Total merchandise exports (excluding aircraft) in the review period grew by 7.7 percent to \$1,361.0 million. Re-exports of fresh fish, machinery, and mineral fuel led the acceleration and was complemented by domestic exports of gold, kava and woodchips.

Over the same period, merchandise imports plateaued with an annual growth of 0.04 percent to tally \$3,804.9 million, slower than the 11.2 percent expansion observed in the comparable 2023 period. However, this outcome was partially shaped by a higher July 2023 base effect.²⁷ Continued growth in machinery and transport equipment imports, complemented by imported manufactured goods was offset by a broad decline in all other import categories, led by miscellaneous manufactured goods, and animal & vegetable oils.

²⁶ Excluding aircraft.

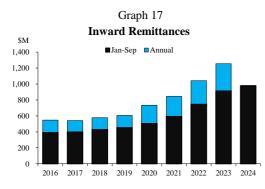

²⁷ A one-off \$107.0m medical equipment import.

Cumulative to June, tourism earnings grew by 13.1 percent to total \$1,136.8 million led by both higher visitor arrivals and per-diem expenditure. This compares to the 125.0 percent²⁸ growth (\$1005.4m) in the same period in 2023 (Graph 16).

Over the June quarter, tourism earnings reached \$646.1 million, 31.7 percent higher (\$155.4m) than the March quarter.

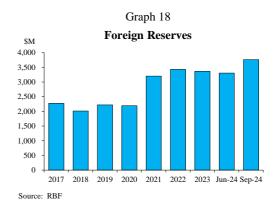

remittances cumulative Inward September 2024 grew by 6.9 percent to \$978.2 million, compared to a 22.2 percent expansion in the comparable 2023 period (Graph 17).²⁹ Outward remittances noted a higher growth of 11.3 percent to total \$362.7 million, however, on a value basis. the growth in inward remittances was higher. Increased personal transfers mainly drove the inward remittance growth.

Source: RBF

In terms of transfer channels, mobile money (46.8%) constitutes the largest share transfer modes, followed by foreign exchange dealers (36.4%) and commercial banks (16.8%).

Foreign reserves (RBF holdings) settled at \$3,762.0 million (6.1 MORI) at the end of September 2024. This was improvement of \$457.5 million from the June quarter (\$3,304.5m) as inflows surpassed the outflows during the period (Graph 18). Strong receipts upheld the foreign reserves position, led by tourismrelated earnings. government drawdowns, merchandise export proceeds and other inflows, which outweighed the elevated major payments. Foreign reserves are projected to remain adequate over the medium term.

Domestic Financial Conditions

The RBF maintained its monetary policy stance at 0.25 percent. The ample liquidity alongside interest rates hovering around historical levels, led to robust growth in private-sector credit.

Ample liquidity in the banking system, measured by banks' demand deposits (BDD), increased by 22.1 percent on a

²⁸ Higher percentage growth is due to base effect on lower tourism in 2022 due to COVID-19 recovery.

²⁹ Recorded its highest monthly collection in August 2024.

quarterly basis to \$2,343.0 million at the end of September.

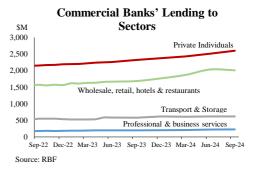

Financial Intermediaries

Broad money (M3) rose annually (6.7%) to \$11,727.3 million in September, higher than the growth (6.4%) in the comparable The growth in M3 was 2023 period. attributed to higher net domestic assets (NDA) (6.9% from 8.1%) and net foreign assets (NFA) (6.5% from 2.2%) in September. The outturn in NDA was driven particularly by private sector credit (11.1%, \$995.3m) to business entities (\$691.3m) and households (HHs) (\$383.1m). Additionally, NFA was largely driven by increases in gross reserves (\$180.1m) as well as other foreign assets (\$64.0m) during the same period.

Within M3, **narrow money** (M1) increased (6.5%) annually, led by higher transferrable deposits (7.3%, \$546.6m), particularly demand deposits of non-bank financial institutions (NBFIs) and HHs. Other deposits also rose (9.1%, \$241.8m) in September, which more-than-offset contractions in currency in circulation (-1.0%, \$46.7m) and the decline in securities other than shares (-56.2%, \$42.1m).

Commercial banks' outstanding loans rose by 12.6 percent (\$1,038.0m) to \$9,303.0 million in the year to September, compared to 7.4 percent in the same period last year. The outcome was led by higher lending to the WRHR (\$323.4m), HHs (\$277.0m) and the real estate (\$192.5m) sectors that jointly comprises 69.7 percent of CBs' lending activities (Graph 20).

Graph 20

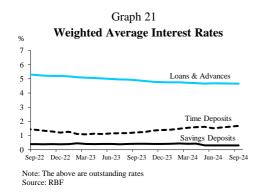

lending by commercial New increased significantly (22.%, \$611.3m) September, cumulative totalling \$3,293.5 million, underpinned by increased new credit to the WRHR (\$294.6m), HHs (\$123.5m), B&C (\$78.0m)professional & business services (\$48.0m) sectors, which offset the decline in lending public enterprise (-\$39.4m),manufacturing (-\$14.2m) and mining & quarrying (-\$3.9m) sectors.

Commercial banks' lending rates continued to fall, however, term deposit rates rose over the review period. The weighted average outstanding lending rate fell to 4.66 percent, from 4.90 percent recorded in September last year. Similarly, the weighted average new lending rate fell to 4.84 percent from 4.89 percent in the previous year.

The upturn in the weighted average time deposit rates is attributed to movements in short-term maturities offering higher rates and attracting higher volume of deposits. Existing time deposit rates rose to 1.69 percent in September from 1.23 percent in September 2023. Likewise, the weighted average new time deposit rate increased to

2.16 percent from 1.19 percent in the previous year.

As a result of these movements, both the new (102bp) and outstanding (71bp) interest rate spread narrowed in the year to September (Graph 21). The movement of the spreads is reflective of the comfortable level of banking system liquidity and risk appetite of banks.

According to the August 2024 BES, most respondents expect commercial banks' lending rates to remain stable in the short to medium term, with commercial banks being the main source of credit for 66 percent of the respondents.

Money Market

Government treasury bills (T-Bills) were undersubscribed by \$64.0 million in the September quarter, with a total of \$70.0 million accepted on the 91 and 364-day maturity ranges, yielding³⁰ 0.10 percent and 1.14 percent, respectively. The overall quarterly movement was primarily due to the August results as there were no issuance on T-bills in July and September. The T-bills have been undersubscribed for the majority of 2024 which has prompted the

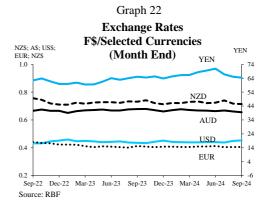

increase in T-bill rates in recent months.

Bond Market

The Fiji Government Infrastructure bonds were undersubscribed by \$43.2 million in the September quarter, and \$234.8 million was accepted on the 2, 5, and 20-year maturities with yields of 0.95, 5.00 and 4.75 percent respectively. There were Viti bonds issued in September only which were undersubscribed by \$31.5 million in the same quarter and \$8.5 million was accepted on 5 and 10-year maturities with yields of 3.00 and 4.00 percent, respectively.

Exchange Markets

Exchange rate movements between the Fijian dollar (FJD) and major trading partner currencies noted mixed outcomes over the year to September (Graph 22).

The Fijian dollar (FJD) appreciated against the United States Dollar (USD) (3.9%) but depreciated against the Australian dollar (AUD) (-3.3%), NZD (-2.2%), the Euro (EUR) (-1.6%) and the Japanese Yen (JPY) (-1.0%) annually in September.

14

³⁰ Rates quoted for the money and bond market are the weighted average rates.

Banking Industry Quarterly Condition Report – 30 June 2024

Overview - Commercial Banks

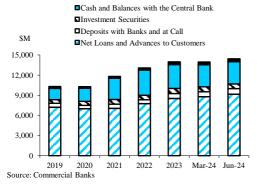

The overall performance of the commercial banking sector was assessed as satisfactory, based on satisfactory earnings, capital and liquidity positions, with a marginal rating for asset quality.

Balance Sheet

Total assets of commercial banks stood at \$14.4 billion, with a growth of 3.4 percent (or \$476.0m) over the quarter, and 5.4 percent (or \$740.0m) over the year.

The growth over the quarter was largely attributed to the increase in net loans (by \$378.2m), deposits with banks and at call (by \$107.1m), 'other' assets (by \$24.8m), exchange settlement account (by \$23.2m) and statutory reserve deposits (by \$8.2m), which was offset by the decline in investments (by \$64.4m) (Graph 23).

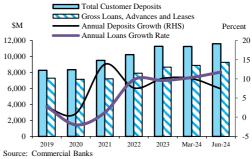

Total deposits increased by 3.0 percent (or \$339.9m) over the quarter to \$11.6 billion, underpinned by increases in demand deposits (by \$338.5m) and time deposits

(by \$2.2m), while savings deposits decreased by \$0.8 million (Graph 24).

Graph 24

Commercial Banks' Customer

Deposits and Loans

The growth in demand deposits of 3.9 percent (or \$338.5m) over the quarter to \$9.0 billion was underpinned by deposit placements from private sector business entities (PSBEs) (by \$200.9m), public enterprises (PEs) (by \$162.4m), private individuals (PIs) (by \$69.2m), and non-residents (by \$68.1m), which were partially offset by the withdrawals made by non-bank financial institutions (NBFIs) (by \$109.4m), and central/local Government (by \$52.7m).

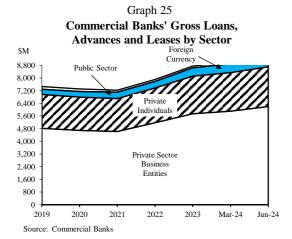

Similarly, time deposits grew by 0.1 percent (or \$2.2m) to \$2.5 billion, largely due to the increase in deposit placements by NBFIs (by \$81.4m), which was partially offset by the withdrawals made by PEs (by \$57.0m), PSBEs (by \$18.6m), PIs (by \$3.6m), and non-residents (by \$1.2m).

However, savings deposits declined by 1.7 percent (or \$0.8m) to \$46.1 million, as a result of withdrawals made by PIs (by \$0.4m), local Government (by \$0.2m) and PSBEs (by \$0.2m). In terms of composition, demand deposits continued to account for the largest share of commercial banks' total deposits at 78.1 percent, followed by time and savings deposits at

21.5 percent and 0.4 percent, respectively.

Commercial banks' gross loans and advances stood at \$9.3 billion, registering a growth of 4.2 percent (or \$373.1m) over the quarter and 11.8 percent (or \$974.9m) over the year.

The quarterly increase in lending was largely driven by loans to PSBEs (by \$294.9m) and PIs (by \$75.9m) (Graph 25).

Sectoral lending concentration of commercial banks continued to be in the PI sector at 27.6 percent, followed by the wholesale, retail, hotels & restaurants (WRHR) (22.4%), real estate (19.8%), and building and construction (8.7%) sectors.

New loans disbursed during the review quarter amounted to \$1.2 billion and were dominated by the wholesale, retail, hotels & restaurants (WRHR) sector at 37.7 percent (or \$433.6m), followed by PIs at 18.9 percent (or \$218.0m) and real estate at 13.8 percent (or \$159.2m) sectors.

Capital Adequacy

Commercial banks' combined capital adequacy ratio stood at 17.2 percent as at

30 June 2024 (March 2024: 17.9%), attributed to a larger increase in total risk weighted assets by 5.1 percent (or \$446.5m) compared to the increase in total capital by 1.1 percent (or \$16.5m).

All commercial banks complied with the prudential minimum capital adequacy requirement of 12.0 percent and continued to be assessed as satisfactory (Graph 26).

Graph 26 Commercial Banks' Capital Adequacy Average Capital Adequacy Ratio Percent Minimum Requirement NPL less Provisions to Capital 32 28 24 20 16 12 4 0 2020 Mar-24 Jun-24

The increase in total capital was underpinned by the increase in unaudited retained profits (by \$25.0m), which outweighed the decreases in audited interim retained profits and general provision for doubtful debts by \$15.3 million and \$0.9 million, respectively.

Source: Commercial Banks

Similarly, the increase in total risk weighted assets was mainly due to the increase in on-balance sheet exposures by 5.1 percent (or \$390.2m) to \$8.1 billion, emanating largely from 100 percent risk weighted assets and off-balance sheet exposures by 5.5 percent (or \$56.4m) to \$1.1 billion.

Non-performing loans (NPLs) less specific provisions to capital ratio stood at 14.5 percent, further decreasing from 15.9 percent reported in the prior quarter, due to

the reduction in NPLs while capital increased.

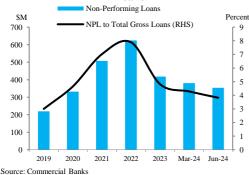

Asset Quality

Asset quality for commercial banks continued to be assessed as marginal as at 30 June 2024, even though classified exposures to gross loans ratio has reduced to 3.8 percent (March 2024: 4.3%) (Graph 27).

Graph 27

Commercial Banks' Non-Performing

Loans

Commercial banks' classified exposures declined over the quarter by 7.0 percent (or \$26.7m) to \$353.9 million, on the back of decreases in substandard (by \$32.6m to \$182.3m) and loss (by \$2.0m to \$44.7m) categories, which offset the increase in the doubtful category (by \$7.9m to \$127.0m). The special mention category noted also a significant decrease of 13.3 percent (or \$40.5m) to \$263.6 million. The decreases noted in the review quarter were mainly due to the upgrading of accounts to the standard category.

Total past due levels for commercial banks declined over the quarter by 9.3 percent (or \$20.7m) to \$202.8 million (Graph 28), attributed to decreases noted in accounts aged "six months to one year" by \$36.7 million and "one to two years" by \$10.8 million, which offset the increases in accounts aged "three to six months" by

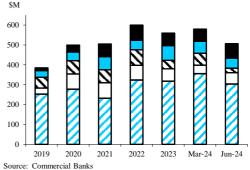

\$15.3 million and "over two years" by \$11.5 million. Less than three months accounts decreased by \$52.8 million to \$303.3 million.

NPLs were concentrated in the PIs sector at 25.9 percent, followed by the real estate (22.4%), WRHR (15.3%), manufacturing (10.7%) and transport & storage (10.5%) sectors.

In terms of coverage, specific provisions declined over the quarter by 4.5 percent (or \$5.2m) to \$110.4 million, due to the reductions in both collectively assessed provisions (by \$1.5m) and individually assessed provisions (by \$3.7m), while banks' impaired assets increased. Specific provisions to non-performing loans stood at 31.2 percent (March 2024: 30.4%).

Graph 28
Commercial Banks' Past Due Status

General reserve for credit losses (GRCL) slightly increased by 0.4 percent (or \$0.5m) to \$127.9 million and covered 1.4 percent of net loans.

Earnings and Interest Spread

Commercial banks' earnings performance was assessed as satisfactory, despite a slight decline in net profit before tax by 1.7

percent (or \$1.5m) to \$87.0 million compared to \$88.5 million recorded in the prior quarter.

The quarterly decline in after tax profits was underpinned by the decrease in net interest income (by \$3.0m) coupled with the increase in operating expenses (by \$0.6m). On an annual basis, net profit before tax increased by 17.7 percent (or \$13.1m) from \$73.9 million (Table 1).

Source: Commercial Banks

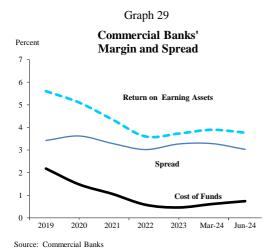

Commercial banks' operating income stood at \$163.1 million, a decline of 0.5 percent (or \$0.8m) from the prior quarter. This was largely due to the decrease in net interest income by 3.0 percent (or \$3.0m), despite the improvement noted in non-interest income by 3.2 percent (or \$2.2m).

Operating expenses grew over the quarter by 0.8 percent (or \$0.6m) to \$79.6 million, attributed to increases in 'other expenses' (by \$0.7m) and 'other management expenses' (by \$0.1m) while depreciation/amortisation expenses declined (by \$0.3m). Bad debts and provisions fell by 2.8 percent, mainly due to write back of provisions or reduction in loan loss provisions, emerging from the decrease in individually assessed provisions. Bad debt write-offs increased \$0.3 million while recoveries marginally declined to \$0.9 million.

While operating expenses increased and operating income declined, resulting in an increase in efficiency ratio from 48.2 percent to 48.8 percent.

The annualised return on assets (ROA) remained unchanged at 2.5 percent in the review quarter while the return on equity (ROE) for commercial banks decreased over the quarter to 15.9 percent (March 2024: 16.4%).

The combined interest spread for commercial banks declined over the quarter by 26 basis points to 3.03 percent, due to the decrease in yield on earning assets, while cost of funding increased (Graph 29).

Liquidity

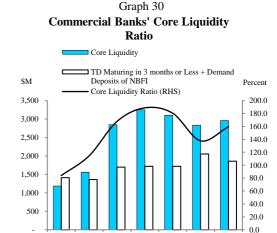

Commercial banks' liquidity position continued to be assessed as *satisfactory* in the review quarter.

Commercial banks' liquid assets³¹ increased for over the quarter by 1.8 percent (or \$64.8m) to \$3.7 billion, largely attributed to the increase in balances due from banks (by \$107.1m) and ESA (by \$23.2m), which offset the decreases in investments (by \$64.4m) and cash on hand (by \$1.0m).

The liquid asset ratio, which is an indicator of the liquid assets available to meet expected and unexpected demand for cash, stood at 25.3 percent in the June 2024 quarter, compared to 25.7 percent in the prior quarter while loans to deposits ratio increased to 79.9 percent (March 2024: 79.0%).

Furthermore, commercial banks' core liquidity³² ratio increased to 159.5 percent from 137.8 percent recorded in the prior quarter. Commercial banks were

³¹ Liquid assets include cash on hand, demand balances at RBF, demand and term balances due from corresponding foreign banks and holding of Government and Quasi Government debt securities. adequately placed to meet short term withdrawal of funds (Graph 30).

Source: Commercial Banks

Overview – Credit Institutions

The overall performance of credit institutions continued to be assessed as satisfactory in the June 2024 quarter, supported by satisfactory capital, earnings and liquidity positions, and a poor asset quality rating.

2022

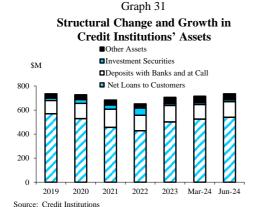

Mar-24 Jun-24

Balance Sheet

Credit institutions' consolidated balance sheet expanded over the quarter by 2.8 percent (or \$20.0m) to \$735.2 million as at 30 June 2024, on the back of increases in net receivables (by \$13.8m), deposits with banks (by \$9.3m) and other assets (by \$7.3m), which offset the decrease in fixed assets (by \$10.0m).

On an annual basis, credit institutions' balance sheet grew by 7.3 percent (or \$49.9m) from \$685.3 million (Graph 31).

³² Core liquidity includes cash on hand, demand balances at RBF and demand balances due from corresponding foreign banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months or less plus demand deposits of non-bank financial institutions.

Balance Sheet Funding

Total deposits increased by 5.1 percent (or \$21.9m) over the quarter to \$447.2 million, attributed to new deposit placements by NBFIs (by \$10.6m), PIs (by \$8.5m), central Government (by \$4.4m) and PSBEs (by \$2.4m), which outweighed the withdrawals from PEs (by \$2.4m) and local Government (by \$1.5m). On an annual basis, total deposits increased by 7.1 percent (or \$29.8m) (Graph 32).

The PIs sector account for the majority of the credit institutions' term deposits at 35.4 percent, followed by the PSBEs (27.5%), NBFIs (18.1%) and PEs (16.7%).

The 15 large depositors stood at \$274.8 million and represented 61.5 percent of the credit institutions' total deposits.

Financial Intermediation

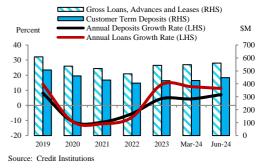

Lending by credit institutions increased over the quarter by 2.1 percent (or \$11.8m) to \$559.9 million and accounted for 76.2 percent of total assets. The growth in lending was largely driven by the increases in borrowings by PIs (by \$9.9m) and PSBEs (by \$2.1m) sectors.

Over the year, gross loans increased by 11.2 percent (or \$56.4m) from \$503.4 million.

Loans to PIs increased by 3.7 percent (or \$9.9m) to \$277.1 million, underpinned by loans for cars, motorcycles and other personal transport and 'others' which comprised of personal loans, and credit card receivables.

Similarly, loans to PSBEs increased by 0.7 percent (or \$2.1m) to \$281.1 million, whereby increases were largely noted in lending to the manufacturing and real estate sectors.

Graph 32
Credit Institutions' Customer Term
Deposits and Loans and Advances

The PSBEs sector continued to account for majority of the credit institutions' gross loans at 50.2 percent, followed by PIs (49.5%) and public enterprise (0.2%) sectors.

The 15 largest credit exposures were reported at \$37.5 million and represented 6.7 percent and 23.1 percent of the credit institutions' gross loans and total capital, respectively.

Capital Adequacy

Credit institutions' capital adequacy ratio continued to be assessed as satisfactory for the review quarter, despite the decline from 28.9 percent to 25.6 percent in the June 2024 quarter. The decrease in capital adequacy ratio was largely attributed to the decline in total capital (by \$17.0m) and the increase in risk weighted assets (by \$8.7m).

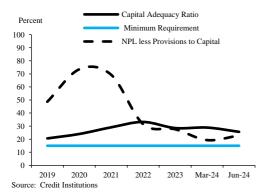

All credit institutions maintained their capital adequacy ratios above the minimum prudential requirement of 15.0 percent.

Total capital declined over the quarter by 10.0 percent (or \$17.0m) to \$152.9 million, attributed to decreases in unaudited retained profits (by \$6.2m) and 'others' category (by \$3.8m), which outweighed the increases in goodwill/other intangibles assets (by \$8.0m).

Total risk weighted assets increased by 1.5 percent (or \$8.7m) to \$596.5 million, because of the increase in other loans to private sector (by \$9.1m) and 'other' assets (by \$11.9m), which were offset the decrease in premises, plant, equipment & other fixed assets (by \$10.2m).

Credit institutions' ability to withstand NPLs related losses, as indicated by the NPLs less provisions to capital ratio, increased from 19.3 percent to 22.9 percent as at 30 June 2024, due to the increase in classified exposures (by \$1.9m) while specific provisions and capital and reserves declined by \$2.9 million and \$5.1 million, respectively (Graph 33).

Graph 33
Credit Institutions' Capital Adequacy

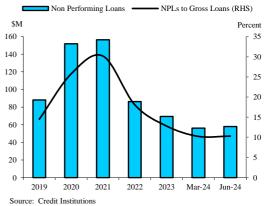

Asset Quality

Asset quality of credit institutions continued to be assessed as **poor** as classified exposures to gross loans ratio was reported at 10.3 percent (March 2024: 10.2%) (Graph 34).

Graph 34

Credit Institutions' Non Performing
Loans

Classified exposures increased over the quarter by 3.4 percent (or \$1.9m) to \$58.0 million, due to the increase in substandard accounts (by \$8.4m) while doubtful and loss accounts declined by \$6.1 million and \$0.4 million, respectively. Special mention accounts stood at \$58.6 million compared to \$73.8 million in the prior quarter.

Impaired assets, on the other hand declined over the quarter by 23.8 percent (or \$11.9m) to \$38.0 million and represented 6.8 percent of gross loans.

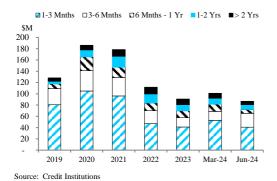

In terms of coverage, specific provisions to classified exposures declined to 36.0 percent from 42.3 percent recorded in the prior quarter. This was underpinned by the decrease in specific provisions, which stood at \$20.9 million, registering a decline of 12.0 percent (or \$2.9m) over the quarter,

while classified exposures increased to \$58.0 million.

GRCL increased by \$3.4 million to \$12.4 million and covered 2.3 percent of net loans as at 30 June 2024.

Past due levels stood at \$46.1 million in the review quarter, a decrease from \$48.5 million recorded in the prior quarter. Decreases were noted in the 6 months -1 year (by 46.8%), 1-2 years (by 16.2%) and over 2 years (by 33.0%), which outweighed the increase noted in the 3-6 months (by 52.4%) (Graph 35).

Graph 35
Credit Institutions' Past Due Status

Earnings and Interest Spread

Credit institutions' earnings performance though still assessed as satisfactory for the review quarter, noted a reduction in profit before tax to \$7.2 million compared to \$8.7 million reported in the prior quarter. The decrease in profit before tax was largely due to the increase in bad debts and provisions by \$1.2 million and operating expenses by \$2.1 million.

On an annual basis, profit before tax declined by 32.1 percent (or \$3.4m) (Table 2).

Table 2						
Quarter Performance	Jun - 23	Mar- 24	Jun- 24	% Change

Source: Credit Institutions

Net interest income stood at \$21.0 million in the compared to \$18.9 million in the prior quarter, largely due to the increase in interest income by 8.1 percent to \$23.9 million, complemented by the decrease in interest expense by 9.4 percent to \$2.9 million. The non-interest income decreased by 20.0 percent to \$0.8 million in the review quarter was due to decreases in service charges/fees.

Operating expenses increased by 23.3 percent (or \$2.1m) over the quarter to \$11.1 million, underpinned by the increases in personnel expenses, depreciation/amortisation expenses and other expenses. Bad debts and provisions increased by 52.2 percent (or \$1.2m) over the quarter to \$3.5 million.

Efficiency ratio deteriorated to 51.1 percent compared to 45.1 percent in the prior quarter, as a result of a greater increase in operating expenses (by 23.3%) compared to the increase in operating income (by 9.5%).

Credit institutions' annualised interest margin (interest spread) widened to 11.9 percent in the review quarter, compared to 10.8 percent in the previous quarter, with an increase noted in the yield on earnings assets, whilst cost of funding liabilities decreased (Graph 36).

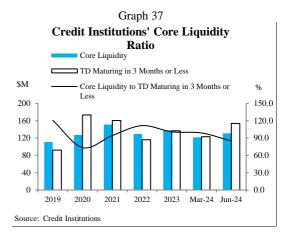

Credit institutions' annualised ROE and ROA ratios (before tax) were recorded at 17.4 percent and 4.0 percent, respectively for the June 2024 quarter.

Liquidity

The liquidity position of credit institutions continued to be assessed as satisfactory as at 30 June 2024.

Liquid assets³³ increased by 6.5 percent (or \$8.9m) over the quarter to \$144.9 million, because of increases in deposits with banks. Liquid assets represented 19.7 percent of the credit institutions' total assets.

Core liquidity³⁴ ratio declined over the quarter to 85.0 percent from 98.8 percent, attributed to a greater increase in maturing short term deposits compared to the increase in core liquid assets (Graph 37).

Insurance Industry Quarterly Condition Report – 30 June 2024

Life insurers' overall performance continued to be assessed as satisfactory in the June 2024 quarter, based on a strong solvency position, with satisfactory liquidity and earnings levels.

Life Insurance Sector

Capital

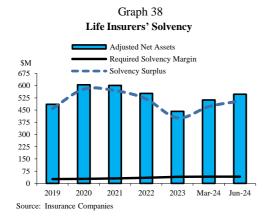

Life insurers' solvency was assessed as strong, following the increase in consolidated solvency surplus to \$505.7 million as at 30 June 2024, well above the minimum solvency requirement of \$41.3 million (Graph 38).

The solvency surplus grew by 7.3 percent (or \$34.6m) on the back of a greater increase in admissible assets by 2.4 percent

³³ Liquid assets include demand and term balances with banks, and holdings of Government and Quasi Government debt securities.

³⁴ Core liquidity includes demand balances with banks. Core liquidity ratio is the ratio of core liquidity to term deposits maturing in three months.

(or \$47.6m) to \$2.05 billion, compared to the marginal increase in admissible liabilities by 0.8 percent (or \$12.6m) to \$1.5 billion. Therefore, the net adjusted assets were reported at \$547.0 million from \$512.1 million in the prior quarter.

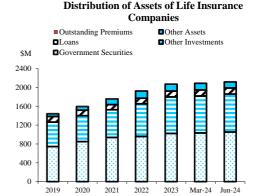

Assets

Total assets of the life insurers noted a steady expansion by 1.5 percent (or \$31.9m) to \$2.1 billion over the quarter, while noting an increase of 6.9 percent (or \$136.4m) from \$2.0 billion over the year.

The expansion in total assets over the quarter primarily emanated from the substantial increase in investments (by \$41.7m) and other assets (by \$3.3m), partially offset by the decreases in cash on hand (by \$14.3m) and other smaller movements

The investment portfolio continued to dominate the total assets of the life insurance sector at 87.6 percent, followed by other secured loans and cash on hand at 6.1 percent and 4.2 percent, respectively (Graph 39). Government securities remained the largest component of total investments at 56.7 percent, followed by shares at 26.2 percent, land and buildings at 10.0 percent, bank deposits at 6.1 percent and debentures at 1.0 percent.

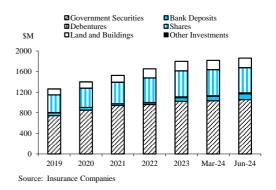

Graph 39

Source: Insurance Companies

Total investments of life insurers reported an upward trend over the quarter, increasing by 2.3 percent (or \$41.7m) to \$1.9 billion. The growth was primarily driven by increases in bank deposits (by \$31.2m), Government securities (by \$19.7m), shares in non-related persons (by \$4.5m), debentures with related persons (by \$4.2m) and land & buildings (by \$3.9m) (Graph 40). On an annual basis, investments grew by 6.2 percent (or \$108.4m) from \$1.8 billion.

Graph 40
Composition of Investments

Liabilities

Total liabilities of the life insurance sector grew by 1.5 percent (or \$29.5m) for the third quarter to \$2.0 billion, on the back of a 1.9 percent (or \$36.6m) increase in the

balance of revenue account, which continued to dominate liabilities at 96.4 percent. Annually, an increase of 6.3 percent (or \$120.6m) from \$1.9 billion was noted for the total liabilities of the life insurance sector.

On the other hand, other provisions further declined by 10.8 percent (or \$5.2m) to \$42.9 million, stemming from the decrease in taxation (by \$5.6m) which compensated for the increase in employee entitlements by \$0.3m. 'Other' liabilities also reduced by 5.8 percent (or \$1.2m) to \$19.9 million, owing to decreases in sundry creditors and amounts due to reinsurers by \$0.8 million and \$0.4 million, respectively.

Earnings

Earnings level of life insurers was assessed as satisfactory for the June 2024 quarter, after recording an improvement in the consolidated after-tax profit by 42.3 percent (or \$5.1m) to \$17.0 million. In terms of annual movements, an increase of 3.4 percent (or \$0.6m) was noted from \$16.5 million recorded in the previous year.

Total income grew over the quarter by 21.6 percent (or \$15.7m) to \$88.5 million, largely due to the growth in asset value appreciation (by \$17.7m) and investment income from interest (by \$1.7m). The increases were slightly counterbalanced by the reduced net insurance premium (by \$5.1m) and other smaller movements.

Correspondingly, total outgoings of life insurers also increased by 12.7 percent (\$7.8m) underpinned by increases in policy liabilities (by \$6.1m) and net policy payments (by \$2.5m), which were slightly offset by the declining operating expenses (by \$0.9m).

Liquidity

Life insurers' core liquid assets further increased by 9.1 percent (or \$16.9m) to \$202.1 million, arising from the increase in bank deposits by \$31.2 million, while cash on hand contracted by \$14.3 million.

The broad liquidity ratio (incl. Government securities), which measures the ability of life insurers to meet their total liabilities, marginally increased to 62.2 percent from 61.3 percent in the previous quarter. Overall, the liquidity position of life insurers continued to be assessed as satisfactory.

General Insurance Sector

Capital

General insurers' solvency position was assessed as strong, following an increase in the consolidated solvency surplus by 14.0 percent (or \$21.9m) to \$177.8 million, above the mandated requirement of \$40.0 million (Graph 41).

Adjusted Net Assets \$M Required Solvency Margin Solvency Surplus 210 180 150 120 90 60 30 2021 2022 2023 2019 2020 Mar-24 Jun-24

Graph 41
General Insurers' Solvency

Source: Insurance Companies

The overall net adjusted assets expanded by 11.8 percent (or \$23.0m) to \$217.7 million, stemming from the increase in total admissible assets by 2.9 percent (or \$16.1m) coupled with the decline in total adjusted liabilities by 1.9 percent (or \$6.9m). This was slightly offset by the increase in solvency requirement by 3.0 percent (or \$1.2m) leading to an overall expansion in the solvency surplus for the June 2024 quarter.

Assets

Total assets of the general insurance sector noted a steady growth during the review quarter by 2.3 percent (or \$14.2m) to \$621.7 million. Annually, total assets increased by 5.8 percent (or \$33.9m) from \$587.8 million.

The quarterly growth in total assets was mainly driven by increases in cash on hand (by \$24.9m), outstanding premium for 3 months and under (by \$13.6m), other fixed assets (by \$2.8m), other intangible assets (by \$2.3m), Government securities (by \$1.4m), shares in non-related persons (by \$1.4m), and other smaller increases.

These gains were partially offset by decreases in bank deposits (by \$10.9m), outstanding claims for over 3 months but 6 months and under (by \$7.2m), amounts due from reinsurers on claims paid for 3 months and under (by \$4.2m), deferred reinsurance expense (by \$4.0m), and amounts due from reinsurers on outstanding claims (by \$4.4m).

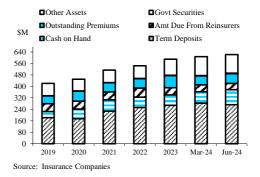

A contraction was noted in total investments of general insurers by \$8.2 million to \$347.6 million, largely attributed to decreases in bank deposits (by \$10.9m). This was partially offset by the increase in Government securities (by \$1.4m) and shares in non-related persons (by \$1.4m). As at 30 June 2024, total investments

comprised 55.9 percent of the total assets of the general insurance sector.

Bank deposits remained the largest component of general insurers' total assets at 43.9 percent, followed by cash on hand at 16.8 percent, outstanding premiums at 11.9 percent and amounts due from reinsurers on outstanding claims at 7.0 percent (Graph 42).

Graph 42

Distribution of Assets for General
Insurance Companies

Reinsurance

Reinsurance premiums ceded offshore fell substantially over the quarter by 69.2 percent (or \$17.3m) to \$7.7 million. All general insurers complied with the reinsurance requirements.

Liabilities

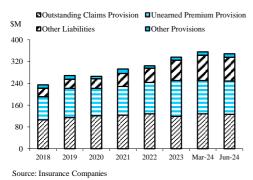

Total liabilities of general insurers noted a decline over the quarter by 1.9 percent (or \$7.0m) to \$353.7 million, and a similar contraction over the year by 1.3 percent (or \$4.7m) from \$358.4 million.

The reduction in total liabilities was underpinned by the decrease in amounts due to reinsurers (by \$6.4m), sundry creditors (by \$1.5m) and outstanding claims provision for reported claims (by \$2.5m).

Outstanding claims provisions (admitted & IBNR) continued to dominate the liability of general insurers at 35.7 percent, followed by unearned premium provisions at 34.5 percent and 'other' liabilities at 24.7 percent (Graph 43).

Graph 43

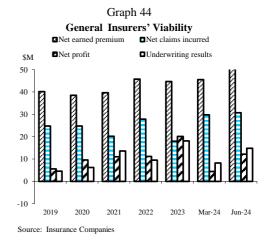

Distribution of Liabilities of General
Insurers

Earnings

Consolidated after tax profits of general insurers noted a positive trend in the review quarter by 172.9 percent (by \$7.7m) to \$12.2 million (Graph 6). The significant increase in profits was largely driven by the improvement in the underwriting result for the quarter by 79.2 percent (or \$6.5m) to \$14.7 million. This was supported by the increased net earned premiums by 17.5 percent (or \$8.0m) that was partially offset by the increase in net claims incurred by 3.0 percent (or \$0.9m) to \$30.7 million and underwriting expense during the quarter by 7.0 percent (or \$0.5m).

On the other hand, non-underwriting income reported a greater increase by 68.0 percent (or \$1.4m) as compared to the increase in non-underwriting income by 11.9 percent (or \$0.5m) (Graph 44).

Liquidity

Core liquid assets (cash and bank deposits) recorded an expansion of 3.8 percent over the quarter (or \$14.0m) to \$377.2 million.

The broad liquidity ratio (incl. Government securities), which measures the ability of general insurers to meet their total liabilities, increased to 107.5 percent from 101.2 percent in the previous quarter. Overall, the liquidity position of life insurers continued to be assessed as satisfactory.

Insurance Broking

Earnings

The insurance broking sector reported an expansion in after-tax profits of 110.1 percent (or \$1.1m) to \$2.1 million.

Total revenue grew from \$3.3 million to \$8.4 million over the quarter, attributed to the increased brokerage earned as commission by 64.1 percent (or \$3.1m) and brokerage earned as fees by \$0.3 million.

Brokerage earned as commission continued to dominate the total brokerage revenue at 93.3 percent, whilst brokerage earned as fees made up 5.6 percent for the total brokerage revenue.

Total expenses also increased during the review quarter by 26.1 percent (or \$1.0m) to \$4.7 million resulting from increases in other expenses (by \$0.7m), salaries and wages (by \$0.2m) followed by other smaller movements.

Broking Account

The broking account balance fell during the review period by 23.5 percent (or \$4.9m) to \$15.8 million, with decreases noted in both monies received and money withdrawn over the quarter.

Total monies received by insurance brokers fell by 30.1 percent (or \$24.5m) to \$57.0 million with decreases mainly noted for premiums received from insureds for payment to local insurers (by \$17.4m) and premiums received from insureds on account of offshore insurers (by \$7.0m). These two categories account for the majority of total monies received at 82.6 percent and 17.3 percent, respectively.

Similarly, total monies withdrawn decreased by 22.7 percent (or \$18.1m) to \$61.9 million, with premium payments to local insurers representing 63.0 percent (at \$38.9m), while premium payments to offshore insurers and payments to self, represented 23.0 percent (at \$14.2m) and 13.6 percent (\$8.4m), respectively.

Offshore Placements

A total of 262 offshore applications amounting to \$15.9 million in premiums were approved during the quarter, when compared to 402 applications at \$27.1

million, approved in the prior quarter (Table 3).

The material damage and business interruption (MD/BI) class continued to dominate the share of premiums remitted offshore at 43.4 percent, followed by term life and others at 18.2 percent and 13.8 percent, respectively.

Capital Markets Quarterly Performance Report – 30 June 2024

Stock Market

The key performance indicators of the stock market such as market capitalisation, SPX Total Return Index (STRI), number of trades, value & volume of shares traded increased over the quarter. The buy and sell ratio continued to reflect the excess

number of listed securities on offer relative to bids.

The market capitalisation for listed securities expanded by 3.9 percent (or \$129.7m) over the quarter to \$3,457.7 million and grew by 6.2 percent (or \$203.0m) over the year (Graph 45).

2400

1200

2019 2020 2021 2022 2023 Mar-24 Jun-24

Source: SPX

The increase in market capitalisation was attributed to the increase in the share prices of three of the top five listed securities, namely Amalgamated Telecom Holdings (ATH) (by \$0.20), Fijian Holdings Limited (FHL) (by \$0.04) and Vision Investments Limited (VIL) (by \$0.04). This growth occurred alongside the quotation of additional 71,970 shares by Pleass Global Limited and 110,598 shares by Kontiki Finance Limited on the SPX trading platform on 22 April 2024 and 27 May 2024, respectively as part of their dividend reinvestment plan.

The composition of the top five listed securities remained unchanged in June 2024 quarter when compared to March 2024, with no new market participants entering or exiting the top five listed securities composition. Furthermore, the top five listed securities comprised of 73.1

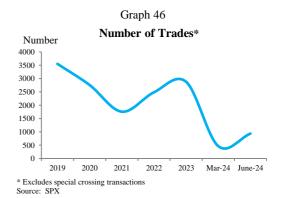

percent of total market capitalisation in June 2024, compared to 72.6 percent in the preceding quarter.

Dividend returns were declared/paid by six listed entities, of which four entities noted an increase, while two listed entities recorded a decline.

The SPX Total Return Index (STRI) for the June 2024 quarter stood at 8,994.13, an increase of 4.3 percent over the quarter when compared to 8,624.22 in March 2024, indicating an increase in capital and dividends over the quarter. The STRI also increased over the year by 8.48 percent (June 2023: 8,291.37).

The average year-to-date (YTD) return for listed entities was 10.88 percent for the June 2024 quarter, consisting of capital gains of 8.8 percent and a current yield of 2.08 percent.

During the June 2024 quarter, 935 trades were recorded compared to 463 trades reported in the preceding quarter (Graph 46).

There was no special crossing transaction reported for the June 2024 quarter. The total volume and value traded increased by

450.9 percent (or 4.6m) to 5.6 million and 647.5 percent (or \$10.3m) to \$11.9 million, respectively (Graph 47).

Graph 47

Source: SPX

The buy to sell ratio increased over the quarter to 1:20 from 1:17.

Managed Investment Schemes (MIS) Market

The MIS market's key performance indicators of funds under management, investment, net profit and number of unitholders noted upward trends over the quarter, while liquid assets declined.

Balance Sheet

The consolidated assets or funds under management for the MIS market stood at \$636.8 million for the review quarter, an increase of 4.3 percent (or \$26.0m) from \$610.8 million reported in the previous quarter.

The quarterly increase in funds under management were mainly on the back of the increase in unitholders funds by 4.6

percent (or \$19.6m) to \$444.6 million and reserves by 3.4 percent (or \$6.3m) to \$192.1 million.

On an annual basis, the funds under management noted an expansion by 17.9 percent (or \$96.9m) from \$539.9 million.

Assets

The consolidated assets of the MIS market noted a further increase of 5.5 percent (or \$34.4m) to \$655.5 million in the June 2024 quarter compared to \$621.2 million in the previous quarter. This was on the back of an increase in investments by 6.3 percent (or \$32.4m) to \$544.3 and accrued income by 268.3 percent (or \$10.9m) to \$14.9 million. The increases were however outweighed by the decline in cash on hand by \$8.6 million to \$94.1 million, and other assets by \$0.2 million to \$2.3 million.

The total combined investments of the MIS market was reported at \$544.3 million in June 2024, an increase of 6.3 percent (or \$32.4m) over the quarter. This was underpinned by the increase in term deposits held with commercial banks and credit institutions with a total value of \$100.1 million, an increment of 5.3 percent (\$5.0m) over the quarter compared to \$95.1 million reported in the preceding quarter.

Unlisted and listed securities also expanded by 10.1 percent (or \$18.4m) to \$200.4 million and 4.1 percent (or \$7.2m) to \$180.4 million, respectively. Similarly, investments in properties recorded an increase of 66.5 percent (or \$2.1m) to \$5.4 million compared to \$3.2 million recorded in the March 2024 quarter.

On an annual basis, the combined investment portfolio of MISs expanded by 22.5 percent (or \$100.0m) from \$444.3 million.

Liabilities

Total liabilities significantly increased by 81.0 percent (or \$8.4m) to \$18.9 million over the quarter compared to \$10.4 million reported in March 2024.

Distributions payables and redemptions payable underpinned the increase in liabilities by 266.0 percent (or \$8.3) and 29.7 percent (or \$1.0m) to \$11.5 million and \$4.4 million respectively. These outweighed the decline in sundry creditors by 41.3 percent (or \$731.0k), 'others' by 8.9 percent (or \$132.0k) and management fee payable by 5.8 percent (or \$37.1k).

Liquid Assets

Liquid assets of the MISs declined over the quarter by 1.8 percent (or \$3.6m) to \$194.3 million, attributed to the decline in cash on hand (by \$8.6m), which was partially outweighed the increase in term deposits (by \$5.0m).

As a result, the liquid assets to unitholders ratio declined to 43.7 percent compared to 46.6 percent in the prior quarter.

Unit repurchases declined over the quarter by 21.1 percent (or \$2.4m) to \$9.0 million, attributed to a decline in repurchases for institutional investors (by \$2.7m) which outweighed the increase in retail investors (by \$290.6). Total repurchases to unitholders fund ratio declined over the quarter to 2.02 percent, from 2.68.

The decline in repurchases led to an increase in the liquid assets to repurchases ratio to 21.61 times, compared to 17.36 times recorded in the March 2024 quarter.

Earnings

The MIS market reported an increase in net income after tax by 227.8 percent (or \$6.0m) to \$8.6 million in the review quarter (March 2024: \$2.6m) (Table 4).

Table 4 **MIS Combined Income Statement**

Quarter	Jun-23	Mar-24	Jun-24	% Change

Other operating income	-	-	-	-	-
Non-investment expense	-	-	-	-	-
Income Tax	-	-	-	-	-
Net Profit after tax	8.8	2.6	8.6	230.8	(2.3)

Source: MIS Returns

Investment income was reported at \$10.3 million, an increase of 144.8 percent (or \$6.1m) over the quarter, while investment expenses also increased by 7.8 percent (or \$124.9k). As a result of the increase in investment income, the annualised return on investment (AROI) expanded over the quarter to 7.6 percent, from 3.3 percent

The Bond Market

The total value of bonds outstanding marginally increased over the quarter by 2.7 percent (or \$166.0m) to \$6.3 billion, compared to \$6.2 billion reported in the March 2024. This resulted from the

additional issuance of bonds over the quarter valued at \$260.5 million, which outweighed the decline in redemptions valued at \$94.5 million.

Government bonds continued to grow the fixed income market through the issuance of Fiji Infrastructure Bonds (by \$260.5m).

However, redemptions were noted for Fiji Development Loan (\$28.85m), Fiji Infrastructure Bonds (\$57.5m), Fiji Development Bond (\$4.0m) and Viti Bonds (\$4.2m).

There was no secondary trading of bonds on the SPX in the review quarter.

Note:

^{1/} The Monetary & Credit Aggregates table is derived from the Central Bank Survey (CBS) (Table 3) and Other Depository Corporations Survey (ODCS) (Table 2).

^{2'} Monetary base is normally referred to as reserve money and its components include currency in circulation, ODCS deposits at the Reserve Bank and other deposits of other financial corporations.

^{3/}As of May 2012, the official definition of broad money has changed to include securities of money issuers. As a result, M3 will now be known as broad money.

Note:

Table 8

 $^{^{1\}prime}$ The Statutory Reserve Deposit is derived as 10 percent of commercial banks' deposits and similar liabilities at the end of the previous month.

From 1996, demand deposits include funds placed in the Trust Account established for re-financing NBF Asset Management Bank.

3 Currency with non-bank public was revised from 2001-October 2015.

^{4/} Held outside of the banking system.

^{5/} Differences, if any, in total assets and liabilities are due to rounding off.

FIJI: LIABILITIES

Note:

 $^{{\}it ''} \ Commercial \ banks \ liabilities \ reported \ in \ the \ table \ include \ both \ local \ and \ for eign \ currency \ denominated \ liabilities.$

^{2/}Previously reported as demand deposits.

^{3/}Previously reported as Local Government. 4 Previously reported as Statutory Bodies.
5 Includes both savings and time deposits.

^{6/} Includes local bills payable.

^{7/} Under Non-Residents, previously reported balance to banks abroad has been separated into transferable and other deposits, while foreign bills payable is classified under others.

** Differences, if any, in total assets and liabilities are due to rounding off.

Note

¹ As defined under the Section 43 of the RBF Act. Since 1996, when the National Bank of Fiji Restructuring Act became effective, Section 31 exempts the NBF Assets Management Bank from holding Statutory Reserve Deposit and Unimpaired Liquid Asset.

^{2/} Balances at the end of the review month.

^{*}Refers to the total only and not individual items. The total is derived as 10% of commercial banks deposits and similar liabilities at the end of the previous month.

 $^{^{4\}prime}$ Balances of deposits and related liabilities as at the end of the previous month.

COMMERCIAL BANKS^{11/}

Note:

n.i.- no issue

n.t. - no trade

 $^{^{1/}}Represents \ monthly \ weighted \ average \ rate.$

²Prior to October 2006, Minimum Lending Rate (MLR) = Repurchase Facility Rate (Policy Indicator Rate + 100 basis points). From October 2006, MLR = Policy Indicator Rate + 100 basis points and Repurchase Facility Rate = latest weighted average overnight interbank rate + 100 basis points. From October 2007, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 5 percentage points). From January 2009, MLR = Repurchase Facility Rate (latest weighted average overnight interbank rate + 2 percentage points).

Note:

1 Data subject to rounding off.

 $^{^{2\}prime}$ Includes both established and non-established staff.

^{3'} From 2013, Charges on Public Debt only includes interest payments and miscellaneous charges associated with debt repayments.

 $^{^{4\}prime}$ From 2015 onwards reflects Fiscal Year e.g. 2015-16.

It does not include debt repayments.

Table 57

Differences from previously published tables are due to revisions.
 Includes Indonesia, Korea, Malaysia, Thailand and Vietnam.

^{3/}Includes France, Netherlands, Spain and Others

⁴Re-export value for "Other Countries" mainly consists of re-exports of fuel to visiting ships and aircrafts.
⁵ Imports value for other countries include imports of aircrafts from France.
